

Gregory (Greg) Jelinek

My name is Greg Jelinek, and I am honored to be considered for a position on the EAA Chapter 93 Board of Directors. My aviation journey began as a student pilot at C29, where I first connected with our local aviation community. For the past 11 years, I have worked at Morey Airplane Company, gaining hands-on experience across multiple areas of airport operations. My responsibilities have included managing the line department, overseeing snow removal and groundskeeping, and most recently managing the parts department for the maintenance shop. This wide range of roles has given me a strong understanding of day-to-day airport operations, aviation safety, and the needs of pilots and aircraft owners.

I have also been an active and committed volunteer for Chapter 93's annual pancake breakfast for the past 11 years. I started by parking cars, then transitioned to parking airplanes on the ramp, helping ensure a safe and efficient flow of aircraft. My family and I have wrapped most of the silverware for the event in recent years, and this year I spent many hours creating the signs used throughout the park area. Supporting this event has always been something I look forward to, and it has strengthened my connection to our chapter and its mission.

If elected to the Board of Directors, my main goal is simple: to serve the members. I will do my best to engage with our community, listen to their needs, and help shape chapter activities that reflect what our members value most.

In addition, I would like to support Vice President Robinson in completing the inventory of the Jim Martin Collection. This includes helping establish a small chapter library built from the historic publications and photographs in the collection. I also intend to create an online catalog of our tool crib—complete with user manuals—to make these resources more accessible and useful to our members.

I believe my long-term involvement, operational experience, and commitment to service make me a strong candidate for the Board of Directors. I look forward to the opportunity to continue contributing to EAA Chapter 93 in a meaningful way.
