

Kara Randall

Candidate for Director

My journey in aviation has taken me through a wide range of general aviation experiences—from an introduction to flying throughout the Caribbean, where I was part of a team that conducted hurricane relief, medevac and government VIP flights, to being a founding member of the Corben Aero Flying Club. I continue to be a proud owner of our Cherokee 140 with the Mendota Flyers.

Over the past two years I've served as Director on our Chapter 93 Board and embraced this opportunity to learn about chapter leadership. I'm not afraid to ask questions, offer constructive feedback, or engage in respectful dialogue that honors differing perspectives. I believe strongly in holding myself, and all of us as leaders, accountable for our responsibilities to the chapter and its members.

Flying is something I'm passionate about, but what inspires me even more is the camaraderie we build as we support one another and work together to become safer, more knowledgeable pilots. That passion guided me in 2019, when—still a student pilot—I revived our chapter fly-out breakfasts. While they certainly helped me build hours, my true motivation was to bring people together and strengthen ties in the general aviation community.

I've always felt a deep love for people. I treasure my career as a holistic health practitioner, licensed massage therapist, and educator. Volunteering at aviation events throughout our community has been a natural extension of that love.

I also serve as a Commissioner on the City of Middleton Airport Commission, where I advocate for the preservation and thoughtful development of the airport. With smaller airports facing increasing pressure from encroaching development, I feel a deep responsibility to help protect and support these essential aviation spaces.

I am deeply committed to ensuring that the diverse interests of our chapter are heard, respected, and genuinely considered. My commitment to aviation, safety, on going learning, and community continues to guide me every day. I'm grateful for the opportunity to serve, to grow, and to help our chapter remain a vibrant, welcoming place for all who share a passion for flight. Thank you for considering my candidacy for Director on the EAA Chapter 93 Board for 2026.
